(a) whether it is a fact that in the recently released human development report made under United Nations Development Programme, it has been revealed that India is lagging behind Sri Lanka in the appraisal indicating progress through human development index;

(b) whether it is a fact that Sri Lanka is at 93rd place amongst 177 countries of the world, whereas India is at 126th place; and

(c) if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF HUMAN RESOURCE DEVELOPMENT (SHRIMATI D. PURANDESWARI): (a) and (b) The Human Development Report 2006 released by the UNDP on 9.11.2006 includes a statement of 177 countries ranked according to Human Development Index. This places Sri Lanka at No. 93 and India at No. 126.

(c) The Human Development Index (HDI) provides a composite measure of three dimensions of human development; living a long and healthy life (measured by life expectancy), being educated (measured by adult literacy and tertiary level), and having a decent standard of living (measured by purchasing power parity income). The report itself states that the HDI is not in any sense a comprehensive measure of human development.
